Rice Mutant Online Submission Form

Please use this form to submit information about a rice mutant to *Gramene*.

A confirmation email will be sent to you by our curators within two days.

Note: Fields with asterisks () are mandatory.*

Help Document for Mutant Online Submission Form

Please use [this form](#) to suggest new terms for the rice mutant. A confirmation email will be sent to you by our curators within three days.

Note: Fields with asterisks () are mandatory.*

Basic Rice Mutant Information

***Mutant Name:** Type the full name for the mutant. Also give the gene symbol for the mutant.

***Phenotypic Description:** A text describing the phenotype for the mutant.

Other Description: A text describing mutagenesis technique, genetic background, environmental condition related with the mutant.

Reference for the Rice Mutant

Ref. Category: Mention the documentary evidence for the mutant, for example, published or personal communication. The option "curator" is for internal use.

Curator: do not select unless you have been authorized as a curator by

[Gramene](#) **NEW**

[Plant Phys 2002 Grass issue](#)

Search:

the Gramene.

Ref. Source: If the option "published" is selected in the "Reference category", then select from the drop of menu, the source of publication, whether it is

- PubMed: if an article is available from PubMed.
- AGRICOLA: if an article is available from AGRICOLA.
- BIOSIS previews: if an article is available from BIOSIS previews.
- CAB abstracts: if an article is available from CAB abstracts.
- ISBN: Mention the ISBN number of the publication, published Journal (if not listed by PubMed) or Book.
- Web site: if the information is presented on a web site, preferably authored by a scientist or hosted by a scientific institution.
- Database: if the information is available from a scientific database e.g. TAIR, SGD, MIPS, GenBank, EMBL, Expasy, etc.

Others: Carefully select this option if any of the above does not apply, as this will help our curators in asserting a quality check on your contribution.

Reference details: please provide the complete citation for the reference which should be cited for the mutant. It should include author, year, title, journal title, volume, page, etc.

Linkeage Rice Map Information (If known)

Map Study: Please select one map study which can be used to describe the map position for the mutant.

Please specify if "Other": Please select this option if any of the above map studies do not apply. Try to give following information on map study: parents for the mapping population, population type (F2 or F3 family, DH, RI, etc.), and details of the reference.

Chromosome number: Please select the chromosome number which the mutant map position is located.

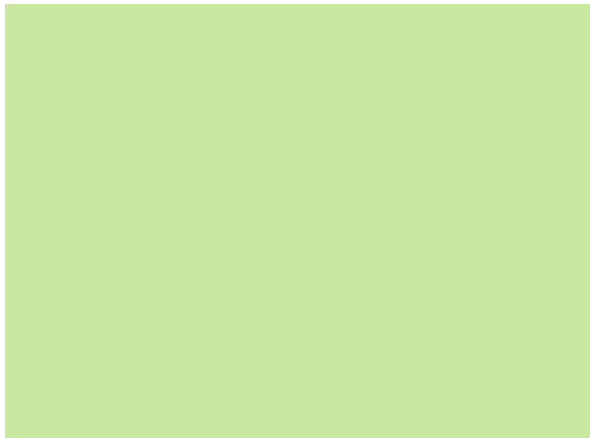

Location on chromosome: Please give cM location on the specific map.

Linked marker(s): Type the name of the linked markers together with the distance between the specific marker and mutant locus, eg. RG9 (5.5 cM).

Contributor Information:

Please provide information about yourself, to help us identify your contribution. Your valuable contribution will be cited, if found appropriate. The mandatory (*) fields are:

Last (Family) name
First name
Organization/institution
Address
